WEEKLY USA GRAIN AND PROTEIN REPORT May 31, 2025

It was a short work week in the USA following the Monday holiday but the market still tried to do exciting things --- probably due to the everchanging tariff situation and the possible reciprocal tariffs from major grain/oilseed importing regions. At this time what may happen with the EU and China and reciprocal tariffs are in question ---- the USA doubling of the import tariff on steel and aluminum will exacerbate the situation with both China and the EU.

USA new crop corn prices dropped by about USD 5 to 6 m/t this week while US soybeans were down by USD 9 m/t and soymeal was almost unchanged on the week. US winter wheat prices were lower by USD 3 or 4 m/t but US spring wheat prices increased by USD 6 m/t.

US spring wheat was higher this week due to quality concerns on the current crop. Trade reports feel that soymeal prices will be moving higher as a result of some harvest delays in South America. Corn was seen being push lower by the very large South American corn crops.

Weather in the US is seen delaying some winter wheat harvests and some corn and soybean planting but the delays should be limited and short.

On the export sales side of things --- corn exports last week were at a good level but soybean exports moved lower. USA corn is still the most competitive in many import markets. Wheat exports were higher than the trade expected.

Next week will once more be a tariff driven market unless every country is just sitting back planning what to do for July deadlines. Perhaps it will be a quiet week --- probably not as we haven't had a quiet week since February.

Estimated Bulk Grain Freight in USD per m/t, basis heavy grains.

<u>SECTION 2 --- FISHMEAL COMMENTS AND PRICES: PERUVIAN "INDICATION"</u> FISHMEAL PRICES:

Fishing in the south of Peru has dropped to almost nothing in the past week --- total landed is now at 194,800 with 56,200 remaining on the quota. Fishing in the North/Central region is also lower this week due to bad weather and fishing bans. The total North/Central catch is now at 1.69 million m/t which shows 1.31 mm/t on the quota.

The juvenile level in the North/Central catch is still quite high so more mini bans are to be expected.

The price spread between super prime/prime and other grades is widening as demand has covered almost all of the higher grade production. Total estimated sales are now at about 500,000 m/t which is almost 75% of total production if the full quota is landed.

Peru's fishmeal exports in 2025, January to April, are at 513,000 m/t which is up by 83% from last year's lower catch shipments. Shipments to Asia are at 88% with 9% going to Europe. China's imports of fishmeal are up by 11.5% January to April 2025, to 624,500 m/t, with 50.2% (313,000 m/t) coming from Peru. All statistics are from the MSI Ceres weekly report.

The weather in North/Central Peru is getting worse for fishing and the mini bans make forecasting difficult. Everyone has their fingers crossed that June will be a decent fishing month and that we will reach full quota.
